

Our Pet Barrier Polypropylene Versus/Comparison Latex Rubber Backing

Beware - Don't be fooled
 Latex Rubber **WILL** let spills and urine seep through and damage your floors!
 Latex **WILL** discolor your Vinyl, Luxury Vinyl Tile (LVT), Luxury Vinyl Plank (LVP) and other flooring!

Item or Issue	Pet Barrier Backing	Others Latex Rubber Backing
Lower Cost Pet Barrier Products	Eco by Design 5' x 8' rug pad eg. Cost \$94.96 20 Years = \$4.74 Per Year Life of Rug Warranty Est 20 years	Other Latex Back - 5' x 8' rug pad eg. Total Cost \$75.96 4 Years= \$18.99 per year Time until Latex starts to breakdown, 3 Yrs.
Vinyl Flooring	These are the only felt Non-skid backing that WILL NOT discolor your floors. Check the Manufactures Care and Maintenance information on their website	LATEX RUBBER WILL DISCOLOR YOUR VINYL FLOOR, according to the manufactures of the flooring. Ask your manufacturer!
Backing	Polypropylene closed cell technology (NO Latex rubber)	Latex rubber, fillers, Styrene, other chemicals that off-gas, 4.3% of the population is Allergic to Latex Rubber
Felt	Nylon, Polypropylene, polyester, yarn	Nylon, Polypropylene, polyester, yarn
Pet Barrier	Pet Urine will never get to your Floors saving you THOUSANDS \$\$ on Floor refinishing WATCH THE VIDEO!	Any Fluid penetrates to your floor immediately creating bacteria growth and damaging your floors
Allergens	NO LATEX RUBBER, NO ALLERGENS, NO OFF-GASSING, Is Certified Green Label plus	This has latex rubber, off gases chemicals used in Manufacturing process, 4.3% of the population is Allergic to Latex Rubber
Certified Green Labeled	They are Certified Green Label. Plus, It will not smell or off-gas. Puts off little to zero VOC's (Volatile Organic Compounds)	Chemicals are used to solidify the Latex Rubber to hold it in place. The chemicals and fillers used, off-gas(smell) and soon start to break down quickly
Washable	The backing is like a plastic milk jug and never breaks down from yours or a Professional cleaning	Washing latex rubber causes it to break down and start degrading faster, in most cases the degradation is immediate
Composition	Polypropylene closed cell technology, is a byproduct of processing petroleum, using up the waste so not going into the atmosphere	Latex rubber is imported from Southeast Asia and many of the fillers and other chemicals come from USA
Made in USA	100% of this product is MADE IN USA	The Latex Rubber is imported from Southeast Asia
Warranty	Life of the Rug warranty means you will never have to replace. The only thing that will degrade the product is direct sunlight to the backing	If you ask to get it in writing, most manufactures do not warranty the backing. If they do, it is a statistical warranty, meaning they are playing the statistics that you will not complain. If you do, the cost is packed into the margins
Backing processes	Laminated to the Felt, will never rub off	Foamed on and will rub off even faster as it degrades
Sustainable	Because the backing it washable and will not degrade over time, it will only make it to the landfill if you decide to throw it out, not because you need to throw it out.	Over 10 Million square feet of rug pad is sent to the landfill every month, most of it is pad with latex rubber backing because it degrades quickly
Radiant Floor Heating	The backing will not degrade or breakdown, it actually gets more grip	The heat makes the Latex Rubber backing degrade immediately

Protecting Your Family, Your Home and Our Planet
